BS Agriculture major in  
**Agricultural  
Extension**

# AGRICULTURAL EXTENSION AS A MAJOR

Facebook page: @UPLBAGEXTENSION

The Agricultural Extension major is designed for students wanting a broad, general background in agriculture while preparing them with appropriate technical and professional competencies in planning, implementing, and evaluating agricultural extension and rural development programs; developing and conducting research in extension; planning and designing agriculture education curricula and training programs; and developing the skills in communication and the application of methods, techniques, and strategies.

Considering the evolving challenges in agriculture, graduates of agricultural extension bring with them technical and functional capacities to promote appropriate agricultural technologies, apply participatory approaches, help organize farmer producers, understand markets and value chains and address changing forms of climatic, social, and economic vulnerability.

## EMPLOYMENT OPPORTUNITIES

Graduates of the program are versatile enough to have careers in education, research, extension, industry, and agribusiness. They can find meaningful career as:

### MAJOR COURSES (18 units)
